

Responsive Images

Magnolia provides a very descent image resizing support but still there are ways to optimize it. With our responsive image module you get sharper results, because we are using an optimized resizing mechanism. You can also define a compression quality for each variation. This will optimize your page speed for different devices on different connection speeds. If you have issues with fitting the scope of your image, you are able to add whitespace around it to get perfect results.

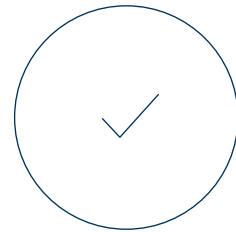

JPEG file size: 243.01 KB

WebP file size: 172.02 KB

Benefits

Strategic Consulting in:

- Magnolia
- Design
- Apps (iOS & Android or Progressive Web App)
- Cloud Hosting

- Headless Systems with DXP based on Basis Magnolia & Angular
- Magnolia Sales Automation based on SAP or Salesforce

Additional benefits

Open Source

Continuous Updates

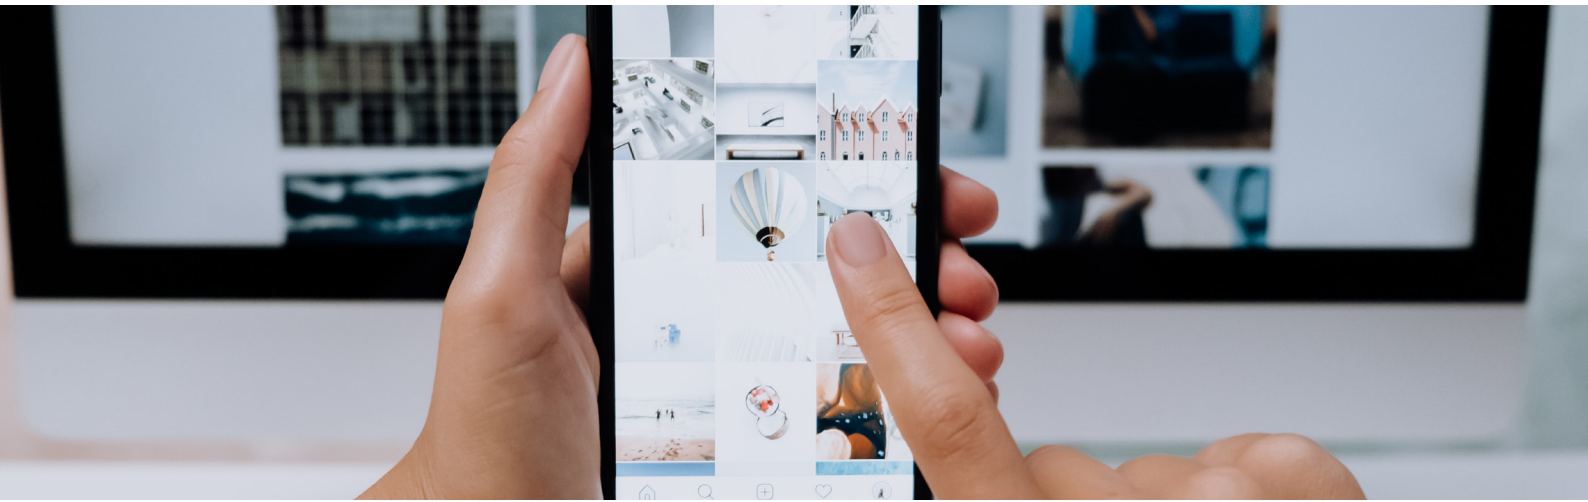

Support

Customization

This module offers you a bunch of additional features which are optimizing your image delivery process.

- Except the general WebP support there is also the ability to compress lossless or lossy for each image rendition. This compress your images even more.
- You could transform a JPG or PNG into a WebP and add a white background to all PNGs. That comes handy if you have authors which just don't care about what they are doing.
- You could define an even more granular quality setting per image variation.
- The image scaling process was changed and brings sharper details for huge original images.
- Advanced fitting features creates optimal images that fits in every resolution.

It generates width and height for usage of images in responsive scenarios.

About Arvato Systems

Global IT specialist Arvato Systems supports major companies through digital transformation. About 3,000 staff in over 25 locations epitomize in-depth technology expertise, industry knowledge and focus on customer requirements.

Working as a team, we develop innovative IT solutions, transition our clients into the Cloud, integrate digital processes and take on IT systems operation and support.

As a part of the Bertelsmann-owned Arvato network, we have the unique capability to work across the entire value chain. Our business relationships are personal; we work with our clients as partners, so that together we can achieve long-term success.
