

Efficient Migration from SAP PO to SAP Integration Suite with the OneEAI Automover

Sustainable integration through structured migration approaches and innovative automation solutions.

Why the Switch to SAP Integration Suite Is Necessary

Among many other SAP applications, SAP Process Orchestration (SAP PO) will reach the end of maintenance by 2027, forcing companies to modernize their integration solutions and migrate to SAP Integration Suite. The OneEAI Automover offers a fast, efficient and low-risk solution to reliably migrate your existing interfaces and configurations to the cloud with a clear focus on future-proofing

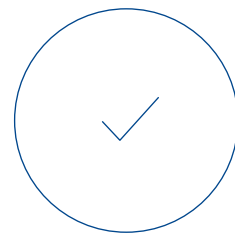

The Challenge of Safe Migration

If your company currently uses SAP PO to integrate important business processes, you face the challenge of migrating hundreds of interfaces to a new platform securely and without errors. You need to ensure that the migration takes place quickly and that ongoing business operations are not disrupted. This requires a solution that both saves time, eliminates errors and in which every migration step is transparently traceable.

The OneEAI Automover as Part of the Comprehensive EAI Suite from Arvato Systems

The OneEAI Automover is not just a single solution, but an important component of Arvato Systems' proven EAI suite. The EAI suite provides a scalable platform for the integration of enterprise applications and supports companies in the seamless integration of IT systems, both in local and cloud-based environments.

Benefits

- **Maximum Time Savings:**
Automation reduces time-consuming manual work to a minimum, making the migration process significantly faster and more efficient.
- **Cost Reduction:** Error reduction and automated analysis can significantly reduce migration costs while improving the quality of the interfaces.
- **High Security and Reliability:**
The automated tests ensure that your migrated interfaces function reliably and integration problems are minimized.

The OneEAI Automover as a Solution for a Smooth Migration to SAP Integration Suite

The OneEAI Automover is designed to support a smooth and efficient transition to SAP Integration Suite. By automating large parts of the migration steps, it helps ensure that companies can benefit from the advantages of cloud integration without unnecessary complexity. How it works:

1. Identification and Analysis

The OneEAI Automover scans your SAP PO environment, identifies all interfaces that are used and those that are no longer required in order to suggest sensible consolidations. This gives you a clear overview and allows you to concentrate on the really important elements.

2. Creation of Configuration Objects

Based on a comprehensive analysis of the previous SAP environment, the OneEAI Automover automatically creates the necessary configuration objects in SAP Integration Suite. All interfaces used are identified and categorized and mappings and connections that are no longer required are sorted out. The relevant data and settings are transferred 1:1 – this ensures that no important information is lost, your integrations continue to run with significantly fewer errors and interfaces that are no longer required are excluded from the migration.

3. Automated Tests

With automated tests based on your historical production data, the OneEAI Automover ensures that all migrated interfaces also function smoothly in the new environment. Errors and inconsistencies are identified at an early stage and can be rectified immediately.

Arvato Systems is an international IT specialist that supports major companies in Digital Transformation. We stand for strong industry knowledge, in-depth technology expertise and a clear focus on customer requirements. Working as a team, we develop innovative IT solutions, transition our clients into the Cloud, integrate digital processes, and take on IT systems operation and support. As part of Bertelsmann, we are built on the solid foundations of a German global corporation. At the same time, we rely on our strong strategic partner network with top international players such as AWS, Google, Microsoft and SAP. We make the digital world easier, more efficient and more secure and our customers more successful. We Empower Digital Leaders.
